

XFrame Studio Wall

 XFRAME

Studio Wall Kit

XFrame Studio Wall combines high-performance recycled acoustic material with the modularity and simplicity of XFrame. Instantly improve the reverberant performance of your space without the need to fix acoustic panels to building surfaces. Panels can be printed-on, custom cut, face-fixed, inset or grooved.

Lightweight

Frame and lining parts formed entirely from 12mm polyester sheets mean XFrame Quiet panels weigh less than 10kg each.

Extendable

XFrame Studio Wall panels are designed to be easily extended and can be collapsed quickly for instant spatial changes.

Single-tool assembly

A single allen key is required to assemble panels from individual flat-packed parts.
